| 14 | Uniform Items - Philadelphia District | Would like a <b>layered system jacket</b> that could add or remove the liner as needed.  | 1 | Not recommended             | The committee has looked into this several times. While the idea has merit, the cost of implementing such a system does not outweigh the benefits. The Corps would be forced to buy out all the outerwear currently in the program.  |

| 18 | Uniform Items - New England District  | <b>Brush Pants:</b> should be available in length sizes of 28 & 29 inseam.   | 2 | No action taken             | Brush Pants come to the contractor already hemmed and in the sizes listed. It is suggested you wash them, as they might shrink, and if they are still too long, have a professional seamstress shorten them for you. The fabric is too thick for a regular sewing machine. |
| 19 | Uniform Items - New England District  | <b>Brush Pants:</b> very comfortable but they really faded in one wash.  | 1 | No action taken             | The brush pants are 100% cotton. Cotton fades. This would be a problem if these pants were worn on a daily basis, however given that the brush pants are for work situations only, the committee felt this to be acceptable.   |

In order to add this item and keep costs down, the Corps adopted the NPS specs.  |

The elastic in the womans waist make the legs too wide. | 2 | No action taken             | There is no prohibition for female employees wearing male trousers if they fit better. We are working with the contractor to improve the fit of the female trousers.   |

| 28 | Uniform Items - New England District | <b>Shirt:</b> Neck sizes run small. When ordering larger size neck the chest or body of shirt gets bigger.                               | 1 | More information needed. | Are you referring to the female shirts or the male shirts?  |
